Education

University of Tartu

MS (Software Engineering) · (2019 - 2021)

FAST-NUCES, Lahore

BS (Computer Science) · (2012 - 2016) · **CGPA: 3.40/4.00**

Projects

AudioSocket

React Hooks and Context API · Ruby on Rails · GraphQL (Client and Server)

Worked as Full Stack Developer to deliver interfaces along with backend for a music store application selling licenses for works of upcoming artists. Context API and Apollo GraphQL was used for State Management and making API requests to the GraphQL Server.

CrowdThnk

Ruby on Rails

Revamped application logic as per transformation of product from a B2C to a B2B product model. As the sole developer, I was responsible for client communication, clarification of queries, task management, development, testing, deployment, delivery and maintenance of the project.

ScanShake

Ruby on Rails

Developed APIs for iOS and Android apps of an event management solution.

Centfix

React.JS

Updated React.JS application from v15.3 to v16.8 and revamped state management logic from Redux Architecture to React Hooks and Context API logic.
